

THE COMBINATION MIRACLE WITH GROUNDBREAKING FEATURES

The BAEHR A 1200 is the innovative combination miracle among professional pedicure devices, because it is not only stronger, lighter, quieter and more economical, but as a class IIa medical device, it also sets standards in terms of operating comfort and hygiene in proven BAEHR quality.

Model:	A1200
Medical device acc. RL 93/42 EEC Cl. 2a:	
Awards	
Dimensions (W X D x H in mm):	approx. 227 x 225 x 110
Weight including handpiece (in kg):	approx. 1,9
Volume (in db):	approx. 47-53
Max. negative pressure (in mbar):	approx. - 70
Air output (volume flow at max. Performance):	approx. 235 l/min
Handpiece idle speed (rpm):	max. 35,000
voltage control unit	110-240 V/50 Hz-60 Hz
Housing:	resistant to Disinfectant
Memory function (number of keys)	2

- Operating voltage: 110 – 240 V AC voltage
- Controller weight: Mix approx. 2,100 g
- Handpiece dimensions: (W x min. diameter x max. diameter) in mm ~117 x ~19 x ~24
- Operating voltage: 110 – 240 V AC voltage
- Frequency: 50 – 60 Hz
- Accuracy of the speeds
- 6,000 – 10,000 rpm, tolerance +/- 25 %,
- 10,001 – 20,000 rpm, tolerance +/- 20 %
- 20,001 – 35,000 rpm, tolerance +/- 10 %

- Medical device according to RL 93/42 EWG class 2a
- Made in Germany
- 2 years warranty. (except for wear parts)
- Full Manual available on request

The core: High performance efficiency is generated at the heart of the BAEHR TEC A 1200 by the two brushless extraction turbines. The first turbine sucks in the air and compresses it directly. In the second turbine, the compressed air is compressed again, whereby an enormous suction power is achieved. The compact design not only ensures lightness, but also the extremely space-saving dimensions of the BAEHR TEC A 1200.

Turbine air flow rate up to 500 l / min and max. Negative pressure of about -70 mbar

Especially quiet in operation pleasantly quiet working atmosphere at 45 - 53 db

Low power consumption of only 80 watts together with excellent efficiency

Long service life and almost wear-free

The aluminum handpiece: Made of high quality aluminum, the handpiece is not just a visual highlight. It is incomparably in the market and impresses with superlatives. The dry technique handpiece is currently the lightest and shortest metal handpiece with on / off switch and in combination with highest ergonomics a real miracle in handling.
