INSTRUCTIONS FOR CLEANING

THE INTENSIVE USE OF
CHEMICALS AND
COSMETICS IN THE
SALON WORK CAN
DAMAGE THE
PERFORMANCE OF YOUR
iQ2 IF YOU DO NOT
CLEAN IT REGULARLY.

gama.professional

iQ₂

TO MAINTAIN THE HIGH PERFORMANCE OF iQ2, YOU HAVE TO CLEAN IT IN 2 DIFFERENT WAYS

1

AUTOCLEANING

2

MANUAL CLEANING

AUROCLEANING

iQ2 Perfetto is the hairdryer further enhanced with innovative and sophisticated technologies and

WARNS THE USER WHEN THE DEVICE NEEDS CLEANING:

A flashing light turns on next to the <A> autocleaning button.

if the hairdryer is used daily, the autoclean function can turn on every 12 hours.

- **Restart iQ2:** turn on and then turn off the hairdryer
- **Remove** accessories (nozzles, diffuser)
- **Press** the <A> button on the bottom of the speed selector for 5/10 seconds.
- iQ2 **automatically** starts autocleaning function, blowing air for 3 seconds from the fore vent, then for 10 seconds in the opposite direction, from the back of the hair dryer.
- This process ends automatically and iQ2 is ready for use.
- At the end of these steps, if you want to do a new autocleaning cycle, **wait 30 seconds.**

DO MANUAL CLEANING AT THE END OF EVERY
WORKING DAY IN THE SALON TO ENSURE A LONG LIFE
FOR YOUR iQ2

MANUAL CLEANING

- **Plug off iQ2 from electricity**
- **Remove** the 2 magnetic filters from iQ2: a micro-perforated metal filter which in turn contains an internal fabric filter
- Carefully **extract** the filters
- **Wash** the filters with soap and water
- **Use** the included brush in the packaging to clean iQ2 to remove dust and particulate buildup on the filters.
- **Wash** under water, rubbing carefully inside and outside
- **Make sure** the water flows without accumulating.
- If the water **flows through the filters**, the cleaning has been carried out **correctly**.
- If the dirt persists, **do these steps again**.

ATTENTION!

Make sure filters are completely dry and free of moisture before placing in the hairdryer.
