

MATERIAL SAFETY DATA SHEET

Prepared in accordance with Regulation EC 1907/2006 (REACH) and 2020/878 (EC)

BALSAMIQUE MASSAGE OIL ANTICELLULITE

ISSUE: 12.2021

UPDATE: -

VERSION: 1.1 EN

PAGE 1 z 7

SECTION 1 Identification of the substance / mixture and of the company.

1.1 Product identifier

Balsamique Massage Oil Anticellulite

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses: cosmetics product

Uses advised against: Any type of use not mentioned above and in section 7.3

1.3 Details of the supplier of the safety data sheet

Supplier: Alba Thyment Sp. zo.o.

Address: ul. Szkolna 98 62-002 Suchy Las

Phone: +48 618 115 407

E-mail address of the person responsible for the safety data sheet: info@albathyment.com.pl

1.4 Emergency telephone number

112 (general emergency telephone), 998 (fire department), 999 (medical emergency)

SECTION 2 Hazard identification.

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP / GHS]:

Skin Sens. 1 Skin sensitisation H317

2.2 Label elements

DANGER

2.3 Hazard Statements

H317 May cause an allergic skin reaction

2.4 Precautionary Statements

Precautionary statements - prevention

P260 Do not breathe dust/fume/gas/mist/vapours/spray

P280 Wear protective gloves

Precautionary statements - response

P101 If medical advice is needed, have product container or label at hand.

P302+P352 IF ON SKIN: Wash with plenty of soap and water

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing

P403 + P235 Store in a well-ventilated place. Store in a cool place.

P501 Dispose of contents / container to properly labelled waste containers in accordance with national regulations.

2.4 Other hazards

The components of the mixture do not meet the PBT or vPvB criteria according to Annex XIII of the REACH Regulation

SECTION 3 Composition / information on ingredients.

3.1 Substance

Not applicable.

3.1 Mixture

Ingredient name	Description	Content [%] w/w	Classification according to Regulation (EC) No. 1272/2008 [CLP]
Essential oil extract of Pelargonium graveolens (Geraniaceae) flowering tops	CAS: 90082-51-2 EC: 290-140-0 Registration number: 01-2120769423-50-XXXX Index number: -	≤ 0,121%	Asp. Tox. 1 H304 Skin Irrit. 2 H315 Skin Sens. 1 H317 Eye Dam. 1 H318 Aquatic Chronic 3 H412

A mixture based on paraffin oil and essential oils

In accordance with art. 1 point 4 of the Act of 25 February 2011 on chemical substances and their mixtures (Journal of Laws No. 63, item 322, as amended), the provisions of this Act shall not apply to cosmetic products. Therefore, these products do not have to be labelled in accordance with Regulation (EC) No 1272/2008 / EC of the European Parliament and of the Council of 16 December 2008 on the classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548 / EEC and 1999/45 / EC and amending Regulation (EC) No 1907/2006 as amended d. The labelling of the

MATERIAL SAFETY DATA SHEET

Prepared in accordance with Regulation EC 1907/2006 (REACH) and 2020/878 (EC)

VERSION: 1.1 EN

PAGE 2 z 7

unit packaging of the cosmetic product should contain information in accordance with Article 19 of Regulation (EC) No. 1223/2009 of the European Parliament and of the Council of November 30, 2009 regarding cosmetic products, as amended d. and the Act of 4 October 2018 on cosmetic products.

SECTION 4 First aid measures.

4.1 Description of first aid measures

On skin contact: the product is intended for skin contact. However, if disturbing symptoms occur, rinse with plenty of water. Consult a physician if necessary.

After contact with eyes: rinse contaminated eyes thoroughly with water for 10-15 minutes, avoid strong water stream - risk of cornea damage, consult a doctor if disturbing symptoms occur. Protect non-irritated eye, remove contact lenses.

In case of ingestion: rinse mouth with water. Do not induce vomiting. Consult a doctor - show the packaging.

After inhalation: remove the sufferer to fresh air, keep warm and at rest. Consult a doctor if disturbing symptoms occur.

4.2 Most important symptoms and effects, both acute and delayed

After ingestion: stomach pain, nausea, symptoms similar to intoxication.

Eye contact: eye irritation, possible burning and redness.

After inhalation: in the case of high concentration of vapours, the product may cause headaches and dizziness.

4.3 Indication of any immediate medical attention and special treatment of the victim

The decision on how to proceed with the rescue is made by the doctor after a thorough assessment of the injured person's condition.

SECTION 5 Fire-fighting measures.

5.1 Extinguishing media

Suitable extinguishing media: foam generating agents, water mist, extinguishing powders, CO₂.

Unsuitable extinguishing media: full stream of water - risk of fire spreading.

5.2 Special hazards related to the substance or mixture

During combustion, toxic fumes may be formed, including carbon monoxides. Avoid inhalation of combustion products, they may be hazardous to health.

5.3 Advice for firefighters

Cool endangered containers with water spray from a safe distance. General protection measures typical in case of fire. Do not stay in the fire-endangered area without appropriate chemical-resistant clothing and self-contained breathing apparatus. Collect used extinguishing media.

SECTION 6 Accidental release measures.

6.1 Personal precautions, protective equipment and emergency procedures

Make sure that the failure and its effects are removed only by trained personnel. Limit the access of bystanders to the endangered area until appropriate cleaning operations are completed. In case of major failures, isolate the endangered area.

6.2 Environmental precautions

In the event of release of larger amounts of the product, steps should be taken to prevent it from spreading into the environment. Notify the appropriate emergency services.

6.3 Methods and materials preventing the spread of contamination and used for cleaning up

Absorb with liquid-absorbing materials (e.g. sand, earth, universal binders, silica, vermiculite, etc.) and place in labelled containers. Treat the collected material as waste. Rinse contaminated place with water

6.4 Reference to other sections

Product waste management - see section 13.

SECTION 7 Handling and storage of substances and mixtures.

7.1 Precautions for safe handling

Work in accordance with the safety and hygiene rules. Avoid eye contamination. Keep unused containers tightly closed. Provision of sufficient ventilation. Use as intended.

7.2 Conditions for safe storage, including any incompatibilities

Store only in original, tightly closed containers. Recommended storage temperature 4-25 ° C. Store away from direct sunlight and heat sources. Keep away from food and animal feed. Protect against frost.

7.3 Specific end use (s)

Avoid contact of the liquid with the eyes, do not eat.

SECTION 8 Exposure controls / personal protection.

8.1 Control parameters

Recommended monitoring procedures

Procedures for monitoring concentrations of hazardous components in the air and procedures for air purity control in the workplace should be applied - if available and justified at a given position - in accordance with the relevant Polish or European Standards, considering the conditions prevailing at the site of exposure and the appropriate measurement methodology adapted to the conditions work.

DNEL (employees):

Not applicable.

PNEC:

MATERIAL SAFETY DATA SHEET

Prepared in accordance with Regulation EC 1907/2006 (REACH) and 2020/878 (EC)

BALSAMIQUE MASSAGE OIL ANTICELLULITE

ISSUE: 12.2021

UPDATE: -

VERSION: 1.1 EN

PAGE 3 z 7

Not applicable.

8.2. Exposure controls

Observe the general rules of safety and hygiene. Do not eat, drink, or smoke while working. Wash hands thoroughly before breaks and after work. Avoid contact with the eyes. Take off contaminated clothing and wash it before reuse. Adequate ventilation must be provided in the workplace. If, during work processes, there is a risk that workers may be doused with corrosive agents or ignite their clothes on the worker - not more than 20 m in a horizontal line from the workstations where these processes are performed, emergency showers (safety showers) for washing the whole body and separate showers (showers) to wash eyes.

Hand and body protection

It is not required for intended use.

Eye protection

Recommended safety glasses in case of risk of eye contamination.

Respiratory protection

It is not required when used as intended and with proper ventilation.

Environmental exposure controls

Do not allow large amounts of the product to enter groundwater, sewage system, sewage, or soil. Possible emissions from the ventilation systems and process equipment should be checked to determine their compliance with the requirements of environmental protection laws.

SECTION 9 Physical and chemical properties.

9.1 Information on basic physical and chemical properties

- physical state / form: homogeneous, easily spreadable liquid, greasy to the touch
- colour: colourless to pale yellow
- smell: characteristic of the oils used
- odour threshold: not determined
- melting point / freezing point: not determined
- initial boiling point and boiling range: not determined
- flammability (solid, gas): not determined
- upper / lower explosion limit: not determined
- flash point: not determined
- auto-ignition temperature: not determined
- decomposition temperature: not determined
- pH value: 5,0 ÷ 6,9
- kinematic viscosity: not determined
- solubility: insoluble in water
- partition coefficient: n-octanol / water: not determined
- vapor pressure: not determined
- evaporation rate: not determined
- density: 0.830 - 0.870 g / ml (20 ° C)
- vapor density: not determined
- explosive properties: not determined
- oxidizing properties: not determined
- particle characteristics: not determined

9.2 Other information

9.2.1 Information on physical hazard classes

Not applicable.

9.2.2 Other safety features

Not applicable.

SECTION 10 Stability and reactivity.

10.1 Reactivity

Non-reactive product. It does not undergo hazardous polymerization.

10.2 Chemical stability

The product is stable when properly used and stored.

10.3. Possibility of hazardous reactions

The product is not reactive.

10.4 Conditions to avoid

Protect against light and temperature above 30 ° C and against freezing.

10.5 Incompatible materials

Strong oxidizers, acids, light metals.

10.6 Hazardous decomposition products

They are not known.

MATERIAL SAFETY DATA SHEET

SECTION 11 Toxicological information.

11.1 Information on toxicological effects

Identity	Acute toxicity	Value	Animal
Essential oil extract of Pelargonium graveolens (Geraniaceae) flowering tops	LD50 oral	>5000 mg/kg bw	rat

Mixture

Information on acute and / or delayed effects of exposure was determined on the basis of information on product classification and / or toxicological tests as well as the manufacturer's knowledge and experience.

Acute toxicity

Based on the available data, the classification criteria are not met.

Corrosive / irritating effect on the skin

Based on the available data, the classification criteria are not met.

Serious eye damage / eye irritation

Based on the available data, the classification criteria are not met.

Respiratory or skin sensitization

Based on the available data, the classification criteria are not met.

Mutagenic effect on reproductive cells

Based on the available data, the classification criteria are not met.

Carcinogenic effect

Based on the available data, the classification criteria are not met.

Harmful effect on reproduction

Based on the available data, the classification criteria are not met.

Toxic effect on target organs - single exposure

Based on the available data, the classification criteria are not met.

Specific target organ toxicity - repeated exposure

Based on the available data, the classification criteria are not met.

Aspiration hazard

Based on the available data, the classification criteria are not met.

11.2. Information about other threats

Endocrine disrupting properties

The product does not contain substances that disrupt the functioning of the endocrine system.

Other information's

Persistent organic pollutant: This product does not contain any known or suspected substances

Ozone depleting potential: This product does not contain any known or suspected substances

SECTION 12 Ecological information.

12.1 Toxicity

The product is not classified as hazardous to the environment

12.2 Persistence and degradability

Data is not available.

12.3 Bioaccumulative potential

Data is not available.

12.4 Mobility in soil

Data is not available.

12.5 Results of PBT and vPvB assessment

This substance / mixture contains no components considered to be either persistent, bioaccumulative and toxic, or very persistent and very bioaccumulative (vPvB) at or above 0.1%.

12.6 Endocrine disrupting properties

The mixture and its components do not meet the assessment criteria set out in the relevant Regulations ((EC) No 1907/2006, (EU) 2017/2100, (EU) 2018/605) which are relevant for the assessment of endocrine disrupting properties for the environment.

12.7 Other adverse effects

The mixture is not classified as hazardous to the ozone layer. The possibility of other harmful effects of the individual components of the mixture on the environment should be considered (e.g. endocrine disrupting capacity, global warming potential).

MATERIAL SAFETY DATA SHEET

Prepared in accordance with Regulation EC 1907/2006 (REACH) and 2020/878 (EC)

SECTION 13 Disposal considerations.

13.1. Waste neutralization methods

Recommendations for the mixture: dispose of in accordance with applicable regulations. Store the remains in airtight containers. Small amounts can be disposed of with municipal waste. Depending on the application, the waste code should be assigned individually.

Disposal methods for used packaging: recovery / recycling / disposal of packaging waste should be carried out in accordance with applicable regulations. Do not mix with other waste.

Community legal acts: European Parliament and Council Directives: 2008/98 / EC and 94/62 / EC.

National legal acts: Dz. Of Laws 2013, item 21 as amended d.; Journal of Laws 2013, item 888.

Legal regulations in the field of waste management

Act of 14 December 2012 on waste (Journal of Laws of 8 January 2013, item 21). Directive 2008/98 / EC of the European Parliament and of the Council of 19 November 2008 on waste. Directive 94/62 / EC on packaging and packaging waste. Regulation of the Minister of the Environment of 9 December 2014 on the waste catalogue (Journal of Laws of 2014, item 1923). Regulation of the Minister of Climate of 2 January 2020 on the waste catalogue (Journal of Laws of 2020, item 10).

Waste type code

120112 * spent waxes and fats

Waste type code for packaging

15 01 02 Plastic packaging

SECTION 14 Transport information.

14.1 UN number or ID number

Land transport: transport is not regulated

Sea transport: transport is not regulated

Air transport: transport is not regulated

14.2 UN proper shipping name

Land transport: transport is not regulated

Sea transport: transport is not regulated

Air transport: transport is not regulated

14.3 Transport hazard class (es)

Land transport: transport is not regulated

Sea transport: transport is not regulated

Air transport: transport is not regulated

14.4 Packing group

Land transport: transport is not regulated

Sea transport: transport is not regulated

Air transport: transport is not regulated

14.5 Environmental hazards

The mixture does not pose a threat to the environment in accordance with the criteria included in the transport regulations.

14.6 Special precautions for users

Wear personal protective equipment in accordance with section 8 when handling cargo. Avoid sources of ignition.

14.7 Sea transport in bulk in accordance with IMO instruments

Not applicable.

SECTION 15 Regulatory Information.

15.1 Safety, health and environmental regulations / legislation specific for the substance or mixture

Act of February 25, 2011 on chemical substances and their mixtures (Journal of Laws No. 63, item 322, as amended).

Regulation of the Minister of Labor and Social Policy of 6 June 2014 on the maximum allowable concentrations and intensities of factors harmful to health in the work environment (Journal of Laws of 2014, item 817).

Waste Act of December 14, 2012 (Journal of Laws 2013, item 21, as amended).

Act of 13 June 2013 on the management of packaging and packaging waste (Journal of Laws 2013, item 888).

Regulation of the Minister of the Environment of 9 December 2014 on the waste catalogue (Journal of Laws of 2014, item 1923).

Regulation of the Minister of Economy of December 21, 2005 on the essential requirements for personal protective equipment (Journal of Laws No. 259, item 2173).

Regulation of the Minister of Health of February 2, 2011 on tests and measurements of factors harmful to health in the work environment (Journal of Laws No. 33, item 166).

European ADR agreement on the international carriage of dangerous goods by road.

1907/2006 / EC Regulation on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45 / EC and repealing Council Regulation (EEC) No. 793/93 and No. 1488 / 94 as well as Council Directive 76/769 / EEC and the Commission Directive 91/155 / EEC, 93/67 / EEC, 93/105 / EC and 2000/21 / EC as amended d.

1272/2008 / EC Regulation of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548 / EEC and 1999/45 / EC, and amending Regulation (EC) No. 1907/2006 with later d.

H318 Causes serious eye damage.

H412 Harmful to aquatic life with long lasting effects.

Training

Before starting to work with the product, the user should learn the Health and Safety regulations, regarding handling chemicals, and, undergo appropriate workplace training.

Information sources

Key literature references and sources for data

- Regulation (EC) No. 1907/2006 (REACH), amended by 2015/830 / EU
- Regulation (EC) No. 1272/2008 (CLP, EU GHS)
- Dangerous Goods Regulations (DGR) for the air transport (IATA)
- International Maritime Dangerous Goods Code (IMDG)

The data sheet was developed on the basis of the safety data sheet provided by the manufacturer, literature data, internet databases (eg ECHA, PUBCHEM, COSING) and the possessed knowledge and experience, taking into account the current legal regulations.

Additional information

The classification was made based on physicochemical tests and data on the content of hazardous components by the calculation method based on the guidelines of Regulation 1272/2008 / EC (CLP).

The above information is based on the currently available data characterizing the product as well as the experience and knowledge of the manufacturer in this field. They do not constitute a quality description of a product or a promise of specific properties. They should be treated as an aid for safe handling in transport, storage, and use of the product. This does not release the user from responsibility for the improper use of the above information and from complying with all legal standards in this area.

Disclaimer

The above information describes exclusively the safety requirements of the product and is based on our present-day knowledge. The information is intended to give you advice about the safe handling of the product named in this safety data sheet, for storage, processing, transport and disposal. The information cannot be transferred to other products. In the case of mixing the product with other products or in the case of processing, the information on this safety data sheet is not necessarily valid for the new made-up material.
