Technical parameters

1. Operating voltage: AC 220V--AC 240V
2. Maximum power of the complete machine: 25W
3. Packing size: 26.5 *14*22.5 (L*W*D) cm

Version: 20140804

High Frequency Beauty Instrument User Manual

Dear customers,

Thank you for choosing our product! Please go through this manual before use in order to ensure the maximum performance of the instrument and the safety in use. Please keep properly for further requires.

Function

Microcomputer touch panel high frequency beauty instrument is the high-tech beauty equipment with functions below:

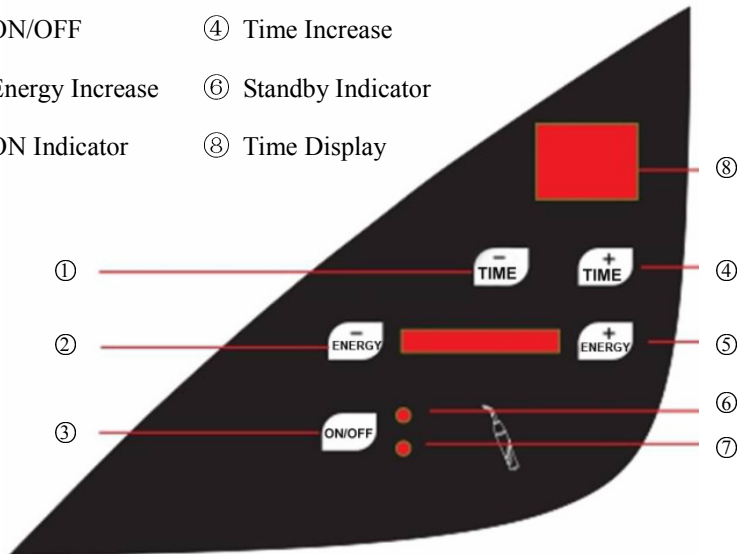

1. Make use of ultraviolet ray to do the irradiation on part or point of skin to sterilize the skin and accelerate wound healing.
2. Get rid of spots, pigmentation, pimples and acne

Specification

1. Easy and fast operation by adopting latest microcomputer technology
2. Smart and reliable treatment by adopting 10 adjustable levels
3. Various methods available by adopting pulse wave

Operation Panel Description

- | | |
|-------------------|---------------------|
| ① Time Decrease | ② Energy Decrease |
| ③ ON/OFF | ④ Time Increase |
| ⑤ Energy Increase | ⑥ Standby Indicator |
| ⑦ ON Indicator | ⑧ Time Display |

Operation

1. Insert the electrode into the handle and keep touch well.
2. Plug in, then you can hear the startup sound "beep", ⑧ is displayed as 30 (minutes); energy is zero, the indicator ⑥ is red, the machine is in standby mode.
3. Press button ③, indicator ⑥ turns green, the second point in ⑧ flashes, and the machine is started.
4. Increase/decrease the energy at 10 levels by pressing button ⑤ / ②
5. Test the electricity by touching the metal.
6. The energy should be not too high to avoid any injury or not too low to weaken the treatment result.
7. If for spot removal use, you need to move the electrode on the spot, then you will see the melanin decreasing. Tiny spot can be removed after one treatment, and bigger one will need 2-3 treatments.

Notes

1. If beautician does the treatment with sterilized gloves, hands should first be cleaned and disinfected with alcohol
2. The electrodes should be sterilized and keep clean and dry
3. Disinfect the treatment part of client with alcohol before treatment
4. Wipe part with anesthetics for 3 minutes and then start the treatment
5. During operation, not to stay too long in a treated area to avoid scars
6. Take off all metal parts (earrings, necklace etc.) before operation
