

MIRACLE

NAIL DUST COLLECTOR

saeyang

1. Part introduction

Main Body

Grate

Power adapter

Power cable

HEPA filter

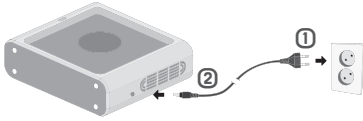

Disposable filter

< Types of filter >

after checking the advantages and disadvantages of each type, choose and use only one that is preferred

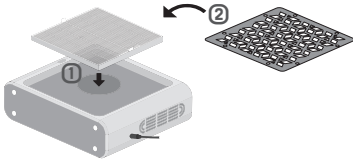

HEPA filter	Disposable filter
<p>Advantages</p> <ul style="list-style-type: none"> * Can be used multiple times after first installation and is more convenient than disposable filters * Causes less dust in the air and easier to move when the dust collector needs to be moved after using * Can take more uses, making it an economical option <p>Disadvantages</p> <ul style="list-style-type: none"> * Difficult for the dust collector to reach 100% suction efficiency because there is always some dust remaining even after cleaning * When cleaning the dust (bin), the dust may blow away causing secondary health risk (please wear a safety mask when cleaning) * Washing the filter with water more than once significantly reduces the effectiveness of the filter, so washing the filter is not recommended 	<p>Advantages</p> <ul style="list-style-type: none"> * The dust collector performs at 100% suction efficiency on every use * A clean filter is used every time, making it a hygienic option <p>Disadvantages</p> <ul style="list-style-type: none"> * Less convenient and more expensive than multi- 1use filters because it has to be replaced for every use * After using the dust collector, moving it or having a gentle breeze around it can cause airborne dust, so the dust must be disposed as soon as possible

2. Product Manual

1. Connect the dust collector to a power source.

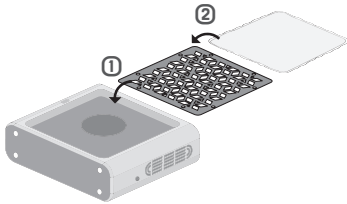

- ① First, plug the power plug into an outlet.
- ② Plug the adapter connector into the power supply of the dust collector.

2. Choose a preferred filter.

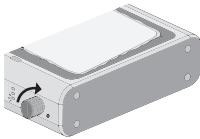

When using a HEPA filter

- ① Check the direction of the arrow on the side of the HEPA filter and insert it into the main body of the dust collector in the same direction
(Make sure to insert them in the same direction. There is a front and back distinction.)
- ② Place the grate over the filter and secure it in place.

When using a disposable filter

- ① First, place the grate on top of the main body of the dust collector.
- ② Place the disposable filter over the grate and adjust the position so that there is no visible gap.

3. Turning on the power

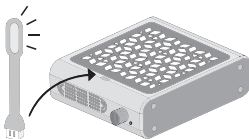

- Turn the switch knob on the side to turn on the power and set the desired speed and noise level.

* When using a disposable filter, it can be adjusted more easily by adjusting the filter while the power is slightly turned on.

4. Status indicator

- Wired & wireless: Express the speed in 5 colors for 5 steps.
- Wireless : Display battery remaining capacity in 3 steps

5. Use

- Take a refreshing care of your nails with the Nail Dust Collector.
- Using a USB lamp allows a brighter work environment.
- You can turn it on / off with the switch on the other side of the lamp.

Warranty Certificate

- The warranty period for this product is 1 year.
